THE MODERN COLLABORATION MODEL

UNIFIED COLLABORATION PLATFORM

Voice, chat, video conferencing, file-sharing and other tools are combined within one intuitive interface.

BUSINESS APPLICATION INTEGRATION

Collaboration tools are integrated with business-critical applications, making business processes and workflows more streamlined.

CLOUD FLEXIBILITY AND SIMPLICITY

Network administration requires vendor-specific skill sets that are difficult to find in today's marketplace.

ENHANCED SECURITY AND PRIVACY

The organization is better able to control the movement of information to improve security, governance and compliance.

BENEFITS OF MODERN COLLABORATION

INCREASED PRODUCTIVITY

Integrated collaboration tools deliver measurable improvements in productivity.

IMPROVED COMMUNICATION

Employees, customers and business partners can communicate and collaborate more effectively.

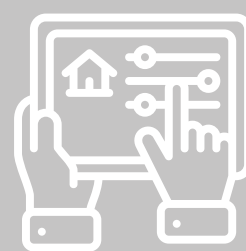

ENHANCED EMPLOYEE EXPERIENCE

Collaboration becomes simpler and more intuitive, optimizing the employee experience and increasing the ability to attract and retain talent.

GREATER VISIBILITY AND CONTROL

The collaboration environment is less fragmented and shadow IT applications are eliminated, giving IT the ability to ensure data protection and regulatory compliance.
